Beyond the Biologic Basis of Disease: The Social and Economic Causation of Illness
An Immersion Course in Social Medicine in Northern Uganda
Gulu, Uganda — January 4 to January 25, 2016

Course Overview
SocMed courses immerse students in the study of social medicine and clinical medicine through personal connection and reflection, praxis, and partnership. In our annual Uganda course, thirty health careers students enroll each year, with half of the spaces filled by students from Ugandan schools, and the other half filled by international students from anywhere outside Uganda. Previous years have included participants from Canada, Germany, Italy, Lebanon, the Netherlands, Sweden, the U.S., and Zimbabwe. St. Mary’s Hospital Lacor in Gulu, Uganda (www.lacorhospital.org) hosts the course in collaboration with Gulu University Faculty of Medicine (GUFM). This upcoming course will run from January 4th – 25th, 2016.

Beyond the Biologic Basis of Disease merges unique pedagogical approaches including community engagement; classroom-based presentations and discussions; group reflection; theater, film, and other art forms; and patient interaction through narrative medicine. These approaches create an innovative and interactive learning environment in which students participate as both learners and teachers to advance the entire class’ understanding of the interactions between the biology of disease and the myriad social, cultural, economic, political, and historical factors that influence illness presentation and social experience of disease.

The course curriculum places considerable importance on building partnerships and encouraging students to reflect upon their personal experiences with power, privilege, race, class, and gender as central to effective partnership building in global health. In the spirit of praxis (a model of education that combines critical reflection with action) these components of the course give students the opportunity to discern their role in global health and social medicine through facilitated, in-depth conversations with core faculty and student colleagues.

Student evaluation is based upon active participation, a reflective essay on a narrative medicine experience, an exam incorporating both the social and clinical components of the course, and group work. Group work consists of developing an advocacy-related project that incorporates the themes of the class and provides the opportunity for continued partnership and sustained momentum after completion of the course.

Course Goals
1. To provide a structured global health immersion experience for health professional students with dedicated supervision and teaching in clinical medicine and social medicine
2. To study issues related to health in Uganda with an emphasis on local and global context
3. To foster critical analysis of global health interventions in resource-poor settings
4. To facilitate the development of a clinical approach to disease and illness using a biosocial model through structured supervision and teaching
5. To build an understanding and skill set associated with health advocacy
6. To promote international solidarity and partnership in generating solutions to global health challenges facing societies throughout the world

Course Curriculum

The course structure brings together teaching in both social medicine and clinical medicine that links to the social aspects of patient and communities. The social medicine component is divided into the following parts:

- **Part 1** – Social Determinants of Health: Accounting for Local and Global Context
- **Part 2** – Health Interventions: Paradigms of Charity, Development, and Social Justice
- **Part 3** – Core Issues in Social Medicine: Primary Health Care, Community Health Workers, Health and Human Rights, and Models of Payment
- **Part 4** – Making Social Medicine Visible: Writing, Narrative Medicine, Photography, Research, and Political Engagement

Course Faculty

A group of course leaders from both the U.S. and Uganda with expertise in tropical medicine, sociology, medical anthropology, and public health make up the core faculty, including:

- **Phyllis Kisa, MB.Ch.B, FCS ECSA** – Ugandan board-certified surgeon affiliated with Lacor Hospital and Makerere University. Completed clinical fellowship in pediatric surgery at British Columbia Children’s Hospital and advises Global Partners in Anesthesia and Surgery.
- **Amy Finnegan, Ph.D, MALD** – U.S. sociologist focused on medical sociology and social change who serves as Chair of the Department of Justice and Peace Studies at the University of St. Thomas in St. Paul, MN
- **Michael Westerhaus, MD, MA** – U.S. internist who serves a medical director and primary care provider at the Center for International Health in St. Paul, MN and a member of University of Minnesota Global Health Faculty.
- **Sande Ojara, MB.Ch.B** – Ugandan medical officer practicing at Lacor Hospital and serving on the board of SocMed.

In addition, numerous experts involved with local health initiatives host community visits, deliver presentations, and facilitate conversations.

Cost

Students coming from high- and middle-income countries pay a full room-and-board and course fee that covers expenses for their participation. Students coming from low-income countries pay a significantly lower course fee that is subsidized.

It is estimated that an average low-income country student fee for the 2016 course will be:

<table>
<thead>
<tr>
<th>Description</th>
<th>Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>Full Room/Board for 1 month (subsidized)</td>
<td>$50.00</td>
</tr>
<tr>
<td>Course Fee</td>
<td>$50.00</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>$100.00</strong></td>
</tr>
</tbody>
</table>

Please note that these fees do not include transportation costs to Kampala, Uganda. In most situations, each student is responsible for paying for transport costs. In addition, this total does not include costs associated with social events, vaccinations, spending money for gifts and other small personal expenses, and any additional travel in Uganda not associated with the course that you may wish to do.
Regardless of country of origin, scholarship opportunities are typically available for students with limited financial resources. If you feel you have sufficient need for a scholarship and would be unable to participate without financial support, please complete the required information on the ‘Scholarship’ section of the application.

More Information and Application Process
Further information and applications can be found on the SocMed website: www.socmedglobal.org. Please view short videos describing the course, publications related to the course, and advocacy videos created by previous students during the course by visiting the “Resources” tab on the website.

Applications are due **July 31st, 2015** and can be downloaded from the website. If you have questions, contact us at socmedglobal@gmail.com.

**SocMed – The Organization**
Founded in 2011, *SocMed* advocates for and implements global health curricula founded on the study of social medicine. In our work, SocMed promotes three P’s:

- **Praxis** – inspired by Paulo Freire, we believe that constant interplay between reflection and action generates critical analysis of the world and deepens our ability to effectively respond;
- **Partnership** – community-building amongst individuals with varied demographic backgrounds offers the most innovative and just means of moving towards health equity;
- **Personal** – who we are and where we come from matters deeply in health delivery. Critical self-awareness enhances our ability to undo harmful structural and societal factors of which we are all part.

By engaging students though careful examination of the social and economic contexts of health and immersing them in partnership with a diverse group of students from around the world, we aim to foster innovative leaders who are ready to tackle challenging health problems in communities around the world.
